DOSAGE

Borchi® Gol 1375 used for the substrate wetting should be added to the finished system. The recommended dosage is 0.05 to 1.50 % as supplied on total formulation. The recommended level can be used for orientation. The optimal dosage is determined through a series of laboratory tests.

STORAGE

Protect from the effects of weathering and light. Store at temperatures between 5 and 30 °C. Once opened, containers should be resealed immediately after each removal of the product. Separation of turbidity may occur at temperatures below 10 °C. This process is reversible and does not affect the product quality. Coloration may occur at temperatures over 40 °C.
